

Business Lists

Expand your marketing reach with a B2B campaign.

Let us help you maximize your direct mail and telemarketing efforts with quality business mailing lists from one of the industry's largest Business-to-Business list databases. We'll help easily pinpoint the business leads most likely to buy your products or services. Our business database is one of our strongest and best performing databases and is a favorite of our customers for these reasons...

Coverage - We have partnered with the largest business list compilers in the industry. With our access to a multitude of available lists, we can offer you access to over 14 million businesses as well as more than 22 million executives within those businesses.

Comprehensive Records - These lists are compiled from multiple sources such as Yellow and White Pages, public records, SEC filings, annual reports, corporate registries, business directories, and association directories. This means the list information we provide has been verified by more than one source. Having access to multiple sources also allows you to customize your target market because of the wide variety of information available on these businesses such as: employee count, sales volume, headquarters or branch, length of time in business, and who the key executives are.

Accuracy - Because the records are constantly updated throughout the year and validated by more than one source, you will have the most current, responsive, and deliverable list available.

Pricing - We continually buy business lists for our customers throughout the year. Our long-term relationships with compilers and the volume of business that we do with them allows us to obtain a very favorable licensing agreement and keep your overall price extremely competitive.

This is just a glimpse of how our business mailing lists can enhance your B2B marketing opportunities by identifying the businesses that most need your products or services. **CONTACT US TO LEARN MORE** and consider testing us on your next business list order to see the difference for yourself!
